EDUCATION

University of Bristol, BSc Data Science (Sep 2024 - Jun 2027)

- Achieved First-Class (Year 1) with 87% in Algorithms & Programming and 83% in Coding & Data Analysis.
- Wrote renewable energy research paper (85%) using Python to analyse 28-year global dataset, revealing inverse GDP-fossil fuel correlation and eight-fold renewable energy growth in high-income countries (2000-2015).
- Proficient in Python, JavaScript, React, SQL, R, C/C++, TensorFlow, Pandas, NumPy, scikit-learn, AWS, and GCP.

Imperial College, Electronics and Information Engineering (Sep 2023 - Jun 2024)

- Completed first year of MEng Electronic and Information Engineering at Imperial College before switching to BSc Data Science at the University of Bristol due to a shift in interests towards data science and tech.

Berkhamsted Sixth Form, A-Levels (Sep 2020 - Jun 2022)

- A*, A*, A*, A in Physics, Computer Science, Mathematics, and Further Mathematics.
- A* (100%) in EPQ: Designed a flow-optimised hydroelectric energy generator to maximise power output.
- Head Boy: Founded Academic Gala; delivered talks to 1,000+ audience members; campaigned on food waste.

Le Wagon, Data Science Bootcamp (Oct - Dec 2022)

- Intensive 10-week course on Machine Learning, Deep Learning, Data Engineering, and Data Analysis.
- Capstone Project: Trained 9 CNN classifiers on 40,000 fashion images with TensorFlow (70–95% accuracy); integrated with ASOS API and KNN similarity model via Scikit-Learn to recommend personalised outfits.

PROFESSIONAL EXPERIENCE

BlackRock, Incoming Analytics and Modelling Intern | London (Jun - Aug 2026)

180 Degrees Consulting, Head of Data Science | Bristol (Sep 2024 - Present)

- Lead 36 consultants delivering pro-bono projects for 7+ social impact clients; achieved 100% satisfaction rates.
- Scaled Data Science division by 112% in six months (17 to 36 consultants), attracting over 450 applicants in 2025.
- Secured Le Wagon (#1 global tech bootcamp) partnership to train consultants in Data Science, Software, and AI.
 - Food Aid Analytics Dashboard, Cirencester Foodbank**
 - Developed Streamlit geospatial analytics dashboard with location clustering to analyse 5,000+ food aid records across 100 data fields, using Python, Pandas, and Matplotlib for data processing and visualisation.
 - Delivered 3 years of insights on regional demand and seasonal trends to enable targeted aid allocation.
 - Data Pipeline for Disease Analysis, EcoSwell**
 - Implemented end-to-end Python data pipeline with Pandas, NumPy, and Selenium, consolidating 66,000 entries from 5 years of weather, dengue, and expenditure data, automating weeks of manual data processing.
 - Used Monte Carlo method to forecast dengue outbreaks in Peru, enabling data-driven public health decisions.
 - Resource Management Web App, everyFAMILY**
 - Deployed React web app with Flask backend and Docker on GCP to streamline digital resource management.
 - Reduced staff onboarding time by 30%; client renewed partnership following operational improvements.

Educatch, Full-Stack Software Engineer | London (May 2024 - Present)

- Designed and deployed data-driven operations management platform using React, Python, and MySQL, automating scheduling, invoicing, and attendance analytics for 50+ tutors and students.
- Reduced administrative workload by 10 hours/week; became company's most-used tool, supporting expansion.

WISENSE, Junior Software Engineer | Berlin (Feb 2023 - Feb 2024)

- Built machine learning studio with React frontend to create video and PLC analysis workflows in under 5 minutes.
- Deployed to Fortune Global 500 clients BMW and ABB for real-time incident detection on production lines.

Connect AI, Junior AI Engineer | Remote (Jan 2023 - Jan 2024)

- Developed GPT-4 LLM-powered customer support assistant with React frontend for startups including Digital Republic, handling 5,000 messages/month with 24/7 multilingual support.
- Implemented RAG (Retrieval-Augmented Generation) workflows with real-time feedback loops, reducing support ticket volume by 20% and improving resolution time by 95%.

EcoSwell, Renewable Energy Intern | Peru (Aug - Sep 2022)

- Built Python-based embedded monitoring system capturing 10,000+ data points weekly across 8 key data types.
- Designed offline logging system for automated, reliable reporting on UN SDG goals in remote conditions.

INTERESTS

Programming Tutor — Tutored 300+ students in Python, Web Development and ML at PMT, codetoday and Code Kids.

Theatre — Performed at Edinburgh Fringe 2024; produced and acted in 15 Bristol DramSoc productions.
